

# Singleron Tensor™

## High Throughput Single Cell Library Processing System

- **Reduce** hands-on time by **90%**
- **Ensure** high **reproducibility**
- **Scale up** your experiments
- **Cut down** turnaround time

**Fully automate the single cell sequencing workflow**

### T-SCOPE Chip Processing

- Process up to 16 microwell chips in parallel
- Capture up to 20K cells per SD chip

### Library Construction

- Generates up to 32 sequencing-ready libraries
