

Socks Template Guidelines

Design Criteria

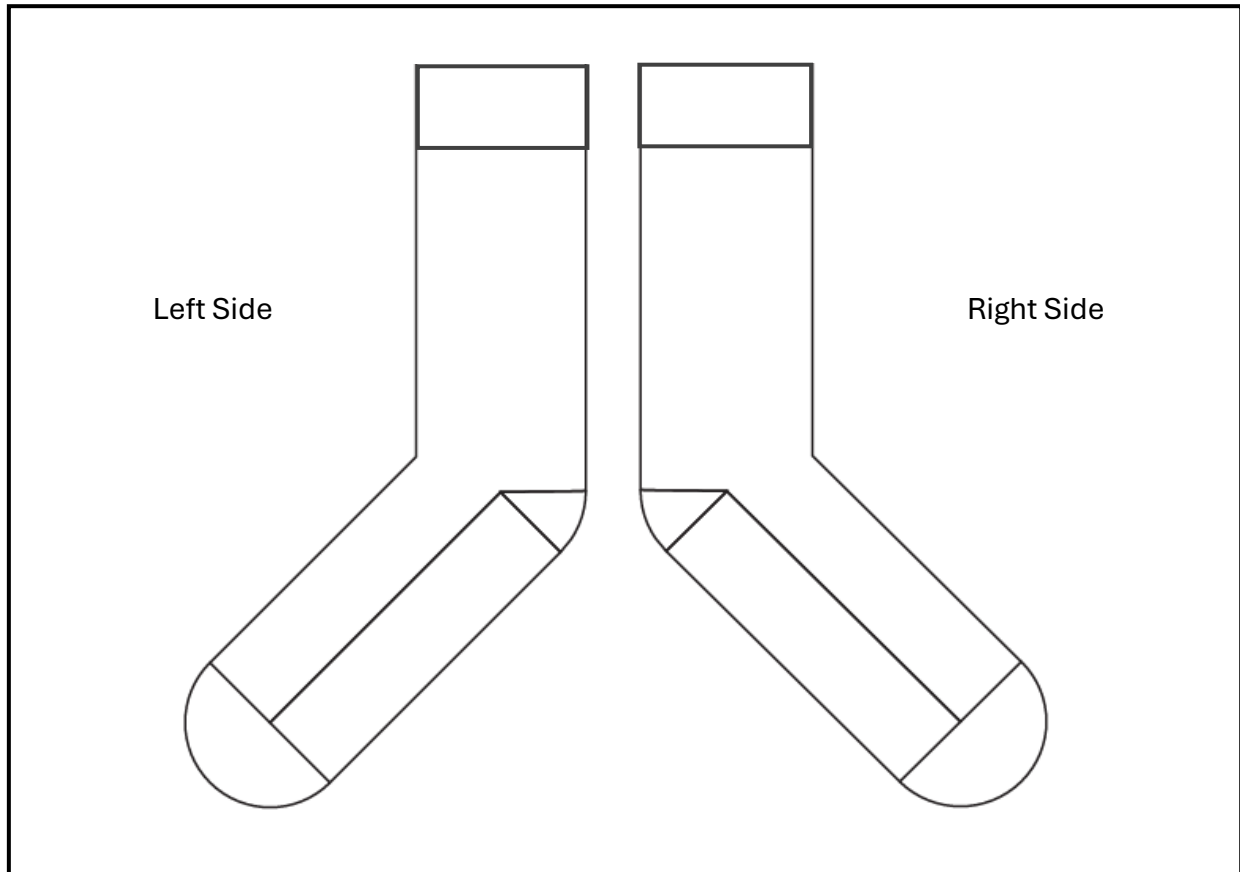

1. Use any technique and your imagination to design a pair of socks that is inspired by single cell science. You can draw, paint, go digital, whatever works.
2. The color scheme is limited to 5 colors, with a requirement to include at least, but not limited to 1 color from Singleron's branding color.
3. Avoid complex & small details or gradients as these are quite difficult to translate onto a sock.

Singleron Branding Colors:

Teal HEX color: #093d5b	Tiger Orange HEX color: #f96c1b	Vibrant Blue HEX color: #0086eb	Science Blue HEX color: #1371b1	White HEX color: #ffffff
